## Beaded Surfer Bracelet

paracordgalaxy.com

### Materials:

5-7 pieces of paracord in various sizes  
cut at 8 inches each

Two 24 inch pieces of micro cord

### Beads

{Cost for this project can vary}

For the bracelet pictured we used five  
strands of paracord in Type 1, 275, and  
425 with micro cord for the binding.

**Step 1:** Gather the mixed cords together.  
With the micro cord, create a small loop  
about 2 inches from one end.

paracordgalaxy.com

**Step 2:** With the long end of the micro  
cord, tightly wrap around all strands of  
paracord working toward the ends and  
your loop. Wrap about 5-7 times then  
insert the end through the loop at the top.

**Step 3:** Pull the short end of your micro  
cord to pull the loop closed. Make sure  
your wrapping is tight, then clip and melt  
the short end. You can also clip the other  
paracords so your ends are even.

**Step 4:** Add beads and weave the cords as desired. Add knots in the cord if you like the beads to stay in place.

Repeat steps 1 through 3 for the opposite ends of your paracord with the second piece of micro cord. Tie the bracelet with a simple bow.

You can also make an adjustable bracelet using a third piece of micro cord and weaving a cobra weave over the overlapping bracelet ties.
