Thread one end of the bungee cord about six inches through the bottom of the leash bolt.

paracordgalaxy.com

paracordgalaxy.com

Step 1: Fold the bungee cord at the bolt and wrap the end of the bungee cord around the long end of the cord.

Step 2: Wrap the short end around a second time moving closer to the bolt.

paracordgalaxy.com

Step 3: Insert the short end through both wraps and pull tight.

Measure the cord to the desired length and add the teardrop clasp. Remember the end will fold back on itself for the handle. Leave six inches of cord after the clasp and repeat steps 1-3 to tie another knot. Trim and melt both ends.

Find the center of the paracord and insert it down through the bottom loop of the leash bolt.

paracordgalaxy.com

Pull both ends of paracord through the loop and pull tight around the knot.

Once you reach the end knot pull the paracord tight to secure, then trim and melt the excess.

paracordgalaxy.com

Clip the teardrop clasp to the D ring to create your handle.

The bungee cord center of this leash will help soften any sudden movements your dog makes.

This leash measures about 35 inches from clip to clip. We used about 3.5 ft of bungee cord and 35 ft of paracord.

You can also make this leash by simply repeating steps 4-7 only. This will use less paracord, but can also hinder the bungee cord from stretching as freely.
