Bungee Dog Leash

Materials

4 ft 3/16” bungee cord
35-40 ft of 550 paracord
Leash Bolt
3/4” D Ring
1 1/4” Teardrop snap clasp

{Cost for this project starts at $10.79}

Step 1:
Fold the bungee cord at the bolt and wrap the end of the bungee cord around the long end of the cord.

Step 2:
Wrap the short end around a second time moving closer to the bolt.

Step 3:
Insert the short end through both wraps and pull tight.
Measure the cord to the desired length and add the teardrop clasp. Remember the end will fold back on itself for the handle. Leave six inches of cord after the clasp and repeat steps 1-3 to tie another knot. Trim and melt both ends.

Find the center of the paracord and insert it down through the bottom loop of the leash bolt.

Pull both ends of paracord through the loop and pull tight around the knot.

Step 4: Bring the right cord over the bungee cord and under the left cord.

Step 5: Bring the left cord under the bungee cord and up through the loop created by the right cord. Pull tight.

Step 6: Bring the left cord over the bungee cord and under the right cord.
Step 7: Bring the right cord under the bungee cord and up through the loop created by the left cord. Pull tight.

Step 8: Take the right cord under the bungee cord and over the left cord.

Step 9: Take the left cord behind the bungee cord and insert it down through the loop created by the right. Pull tight.

Step 10: Bring the left cord over the bungee cord and over the right cord.

Step 11: Take the right cord over the bungee cord and down through the loop created by the left cord. Pull tight.

Repeat steps 8-11 until you have about 8 inches of bungee cord left. Insert both paracord ends through the D ring and continue with steps 8-11.
Once you reach the end knot pull the paracord tight to secure, then trim and melt the excess.

Clip the teardrop clasp to the D ring to create your handle.

This leash measures about 35 inches from clip to clip. We used about 3.5 ft of bungee cord and 35 ft of paracord.

You can also make this leash by simply repeating steps 4-7 only. This will use less paracord, but can also hinder the bungee cord from stretching as freely.

The bungee cord center of this leash will help soften any sudden movements your dog makes.
