Create a four strand double cow's hitch with the black paracord. See our [tutorial for instructions](#). Insert the other cords through the knots at the working end with equal length on each side.

paracordgalaxy.com

**Step 2:** Bring the left camo cord behind the two left core strands and up through the center.

**Step 1:** Bring the left camo cord over the top of the left black working end.

paracordgalaxy.com

**Step 3:** Fold the camo cord back and insert it down between the two left core strands.

Patterns

**Step 4:** Wrap the camo cord around the left strand and back down between the two left core strands.

**Step 5:** Repeat steps 1 through 4 with the right strands.

**Step 6:** Bring the left black cord down between the two left core strands where the camo cord also went through.

**Step 7:** Bring the right black cord down between the right core strands.

**Step 8:** Cross the two black cords behind your bracelet. Push the cords up and tighten the slack. Continue repeating steps 1 through 8 with the camo cord behind the black in step 1.

**Step 9:** Once you have a few knots done or have completed the bracelet length, add in the coyote cord by attaching a lacing needle and inserting the left cord through the center.

**Step 10:** Insert the coyote cord down where the left camo cords overlap.

**Step 11:** Repeat steps 9 and 10 with the right side. Continue the length of the bracelet.

Once you reach the end of the bracelet, weave the cords to the back through nearby spaces.

Insert each cord end through a stitch or two on the back of the bracelet then trim and melt the ends.

This made a 9 inch long bracelet that is about 1 3/8 inches wide.
