Celtic Bar Bracelet

Materials:

Four 6 foot pieces of Type 1 paracord

{Cost for this project starts at $2.99}

Step 1: Find the center of all four cords. Lay two cords vertically (A) and two horizontally (B) at the centers.

Step 2: Bring the top half of cords A down and to the right below your horizontal cords.

Step 3: Bring the right side of color B down over color A.

Step 4: Take the left side of color B behind color A.
Step 5: Cross the left side of color B over the right side of color B and pull tight. Leave a loop in color A about a half inch. You may find it helpful to secure loop A as you work.

Step 6: Take the right side of color A and lay it over the right side of color B.

Step 7: Take the left side of color A and bring it behind the left side of color B.

Step 8: Cross the left side of color A over the right side of color A.

Pull cords tight, but keep your braiding flat. Repeat steps 6 through 8 with color B.

Repeat the same process always working with the color on the top until you reach the desired length.
Separate the cords as shown using the top-most cord on the right and left as cord 1 and 2.

Step 9: Bring cord 1 over all the center cords and under cord 2.

Step 10: Take cord 2 under all the center cords and up through the loop created by cord 1. Pull the knot tight.

Repeat steps 9 and 10 to create a square knot. Pull tight and trim and melt the ends of cords 1 and 2.

Using the remaining six strands to tie a diamond knot using three strands as if they were one. See our diamond knot tutorial for detailed instructions.

Trim and melt all remaining strands. We used Type 1 paracord for this bracelet and the end product was about ½ inch wide.
