Coin Knot Bracelet with Cobra

Materials:

Two 6 ft pieces of 275 paracord
(We used two colors)

{Cost for this project starts at $3.98}

Find the center of both cords and lay one on top of the other as shown.

Step 1: Begin a cobra weave by bringing the right side of the bottom cord over the two top cords and under the left cord.

Step 2: Take the left side cord behind the center cords and up through the loop created by the right cord.

Pull the knot tight. Leave a small loop about a half inch long in the center color cord for your knot and loop closure.
Step 3: Continue the cobra weave by bringing the left cord over the center cords and under the right cord.

Step 4: Bring the right cord under the center cords and up through the loop created by the left cord. Pull tight. Repeat steps 1-4 until you have about three inches of braiding.

Step 5: With the left two cords, one of each color, create a loop as shown with the working ends on top.

Step 6: Take the two right cords and place them behind your loop.

Step 7: Take the working ends of the right cords and lay them over the working ends of the left cords as shown.

Step 8: Continue with the working ends of the right cords and bring them up through the space between your loop and the cobra braid.
Step 9: Bring the working ends of the right cords under the cords you laid in the center of the loop. Then bring them over the side of the loop as shown. Pull the cords tight and adjust as needed. Your knot should look like this.

Step 10: Take the two cords of the same color to use as your center cords. We used the opposite color as in the beginning. Use the other color to continue making a cobra weave. Continue repeating steps 1-4 until you have about three inches of braiding. Trim and melt the outside color leaving the center cords to create a knot.

Use the center cords to tie a diamond knot or any other knot that will fit through your loop at the beginning. This made an 8 inch bracelet.
