Step 1: Fold the type 1 cord in half. Measure the cord to desired bracelet length, then tie an overhand knot or diamond knot at the ends. See our other tutorial for diamond knot instructions. Trim and melt excess.

Step 2: With the micro cord, tie an overhand knot around the two cords of the bracelet near the knot you formed earlier. Leave a half inch tail of micro cord and pull tight.

Push the bead close to your wrap and continue wrapping on the other side of the bead. Repeat steps 3 and 4 as desired until you have a small loop at the end big enough to fit over your beginning knot.

Step 5: To secure, form a hitch knot by wrapping a loop around the bracelet then bring the working end of your micro cord up through the loop. Pull tight and repeat 2 or 3 times. Trim and melt excess.
