Bring both cords to the other end of the bracelet and insert them down through each knot to create a six strand core.

paracordgalaxy.com

**Step 2:** Bring the right cord over the three right strands, under the next two and over the far left strand.

**Step 3:** Bring the left cord over the three left strands, under the next two and over the far right strand.

**Step 4:** Fold the gold cord up over the crossed black cord and insert it down between the second and third black cords. Let it lay to the left.

**Step 5:** Bring the black cord over the crossed gold cord and insert it down between the second and third gold cords. Let it lay to the right.

**Step 6:** Bring the gold cord back to the front and under itself then down through the middle of the bracelet as shown.

**Step 7:** Bring the black cord back to the front and under itself then down through the middle above the gold cord in the previous step.

Pull everything tight. Repeat step 2 through 7 tightening as you go, but leaving a slight gap between each.

**Step 8:** Once you reach the end, bring both cords up through the center of the bracelet just above the bottom knots.
