## Grasshopper Bracelet

paracordgalaxy.com

paracordgalaxy.com

Join your two pieces of paracord together.  
Insert the middle down through one end of  
your buckle.

Insert both ends through the loop in the  
middle of the cord and pull tight to form a  
knot.

paracordgalaxy.com

Insert both ends down through the other  
buckle end and measure to desired length.

**Step 1:** Wrap the right working end under  
then over the right cord then insert it down  
through the space it created. Pull tight.

Repeat step 1 with the left side to secure.  
Measure your bracelet again and adjust if  
needed. (Do this part only once)

**Step 3:** Wrap the left working end  
over then under the left cord and bring it up  
through the space it created. Pull tight.

Continue repeating steps 1 through 4 until  
you reach the end. A lacing needle comes  
in handy at the end to get it tight.

**Step 2:** Bring the right working end over  
then under the left cord. Then bring it over  
itself and insert it down through the middle  
of the bracelet as shown. Tighten.

**Step 4:** Bring the left working end  
over then under the right cord. Then bring it  
over itself and insert it down through the  
middle of the bracelet as shown. Tighten.

With the knots tight, trim and melt the  
ends. For extra security you can lace the  
cord back through before trimming.

Back

We also made this with a four strand core  
and larger buckle for a wider bracelet.
