Step 1: Fold your blue cord in half and insert the middle down through one end of your buckle.

Step 2: Bring both ends through the loop in your cord and pull tight.

Step 3: Insert both cord ends down through the other end of your buckle and measure to the desired length.

Step 4: Bring the right cord between the core strands and wrap it over the right strand and up through the space it created. Pull tight.
Repeat step 4 with the left side.

Insert your white cord through both knots and position it so you have equal lengths on both sides. Tighten the blue cord knots.

**Step 5:** Wrap the left cord over the right strand then bring it up in the space it created as shown. Tighten.

**Step 6:** Bring the right cord down through the middle of the bracelet and wrap around the left cord and insert it through the space it created as shown. Tighten.

Repeat steps 5 and 6 until you reach the end of your bracelet. Try to keep your bracelet flat and don’t tighten too much.

Attach a lacing needle to your white cord and weave it up and down through your bracelet as shown.
On the right side of your white, skip one row and weave it in a similar fashion so your right and left sides will alternate as you go down the length of your bracelet.

Once you reach the end, weave each cord end back through your bracelet on the back before trimming and melting each end.

This made a 9 inch bracelet. You can also do this without the white stitching if desired.
