If using a magnet clasp, cut the 550 paracord in half and glue and insert both ends into the clasp. Let dry.

If using a knot and loop closure, fold the paracord in half and lay it across the middle of your micro cord and lay it across the 550 paracord.

paracordgalaxy.com

Step 1: Bring both working ends of the micro cord up between the 550 cords and above the middle of the micro cord.

Step 2: Bring the left micro cord down over the middle of the micro cord and under the left side of 550 cord. Repeat with the right side.

Step 3: Take the left micro cord and bring it over the left 550 cord and under itself. Repeat with the right side.

Step 4: Pull the knots tight and position close to the clasp or to create the desired size loop. Cross the left micro cord over the right micro cord.

Step 5: With the new left micro cord, wrap it over then under the 550 cord and over itself. Pull tight.

Step 6: With the same cord, wrap it under then over the 550 cord and under itself. Pull tight.

Repeat steps 5 and 6 with the right side. After tying both sides, cross the micro cord and continue repeating steps 5 and 6 with each side until you reach the desired length.

Once you reach the end, loosely wrap the micro cord in opposite directions a few times.

On the back side, bring the ends of the micro cord up under the loose wraps and pull it tight to secure. Trim and melt the excess. Can also use a little glue for added security.
