Fold your paracord in half. This will be your loop closure end.

Step 1: Loop the right side of the cord up and place it behind the middle loop.

Step 2: Loop the left side up and lay it on top of the middle loop.

Step 3: Bring the cord laying on top above the right loop and wrap it around and up through the right loop.

Repeat steps 1 through 4. Before tightening each knot, insert a pencil so you have consistent sized spaces.

Once you reach the desired length, on the last knot trim the ends with some length to spare and melt slowly.

We used about six ft of 550 paracord for an 8 inch bracelet. The smaller is made with about 6.5 ft of Type 1 paracord with tighter knots for a 6.5 inch bracelet.
