Ladder Paracord Bracelet

Materials:

6-8 ft of paracord 550 or smaller

(Cost for this project starts at $1.99)

Fold your paracord in half. This will be your loop closure end.

Step 1: Loop the right side of the cord up and place it behind the middle loop.

Step 2: Loop the left side up and lay it on top of the middle loop.

Step 3: Bring the cord laying on top above the right loop and wrap it around and up through the right loop.
Step 4: Bring the cord at the back above the left loop and wrap it around and down through the left loop.

Step 5: Pull both ends tight leaving a small 1 inch long loop.

Repeat steps 1 through 4. Before tightening each knot, insert a pencil so you have consistent sized spaces.

Once you reach the desired length, on the last knot trim the ends with some length to spare and melt slowly.

This last knot will be your toggle to fit through the beginning loop.

We used about six ft of 550 paracord for an 8 inch bracelet. The smaller is made with about 6.5 ft of Type 1 paracord with tighter knots for a 6.5 inch bracelet.
