Repeat steps 1 and 2 with the remaining three cords so your disk looks like this.

Take your 325 or 425 cords and clamp or tie the top ends together

**Step 3:** Braid the cords together by bringing the left cord over the middle cord.

**Step 4:** Now bring the right cord over the new middle cord.

Repeat steps 3 and 4 until you reach the other end. Clamp or tie to keep it from unraveling. Measure all of your cords to the desired length and trim as needed.

Bring together one side of the braided cords and the cords attached to one side of the disk. Trim and melt all ends so they are even.

Spread a little glue inside one end of the magnet clasp. We recommend E6000. A superglue gel works as well, but be careful. Insert the cords and let glue dry.

Repeat with the other side making sure your strands are straight.
