Materials:

7.5 feet of 550 paracord

{Cost for this project starts at \$1.99}

paracordgalaxy.com

Step 1: Create a small loop with the right side on top leaving about a 1/2 inch tail.

paracordgalaxy.com

Step 2: Insert the long end of paracord up through the loop creating a new loop.

Step 3: Pull the short cord to close the first loop leaving one new loop.

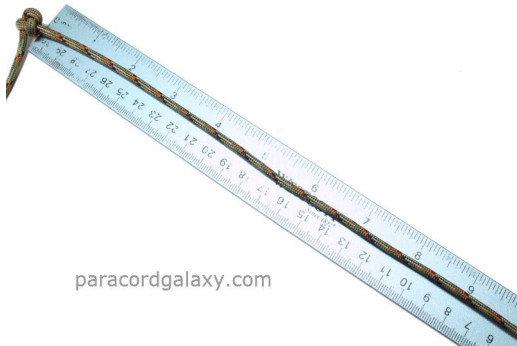

paracordgalaxy.com

Step 4: Insert the short cord up through the back of the loop. Pull the long cord to close the loop and tighten the knot.

Measure the cord to the desired length.
Do not include the knot in your
measurement. We measured to 9 inches.

Step 5: At the desired length, pinch the
cord and bring the remaining length to just
below the knot and then back. This gives
you three strands for the core.

paracordgalaxy.com

Step 6: At the end opposite the knot, mark
a loop about one inch long. With the third
strand, start to wrap it around all three
strands of your core.

Continue to wrap the cord around all three
strands moving toward your knot at the
other end. Be sure the first four wraps are
tight so you won't risk losing your loop as
you work.

paracordgalaxy.com

As you wrap, you may need to push the
wraps down toward the loop in order to
use up all of your cord. Once you reach
the knot, you should have a short 1/2 inch
piece left. Insert the end through the
small loop remaining located just under
the knot. Push up on the wraps to close
the loop, then even out the wraps
throughout the bracelet. Trim and melt
the ends if needed. Be sure the knot fits
through the loop end of the bracelet.
