Step 1: With the coyote cord, make a four strand double cow's hitch. See our tutorial for instructions.

Step 2: Bring the working ends of the coyote cord to the other buckle end and insert them up through the side of each knot. Insert the cream cord through both knots with equal length on each end.

Step 3: Bring both coyote cords and cross them behind the core strands of the bracelet.

Step 4: Bring the left cream cord behind the bracelet and insert it up between the first and second left core strands and above the crossed coyote cords.
Step 5: Bring the same cord down below the crossed cords and insert it up through the loop created on the left side.

Step 6: Now bring the cord and insert it down between the second and third core strands on the left side.

Step 7: Insert the same cream cord up through the center of the bracelet above the crossed cords.

Step 8: Bring the cream cord and insert it down between the first and second cords on the left as shown.

Step 9: Bring the cream cord back up and insert it through the center again above the crossed coyote cords.

Step 10: Now bring the cream cord down and insert it under the cream cord that crosses down to the right as shown.
Step 11: Repeat steps 4 through 10 with the right side. *You can also work both sides on each step at the same time if desired.

Step 12: Work out the slack in the cream cord to tighten, then pull the coyote cords tight as well. *We found it easier to tighten the cords on the back side as we worked out the slack.

Continue repeating steps 3 through 12 until you reach the other end. Then insert all the cords to the back of the bracelet.

Weave the ends through if needed, then trim and melt.

This made an 8 ½ inch bracelet
