Bring the cords up through the loop.

If using two colors, melt the ends of two pieces of paracord and join together.

Make a loop near the joined ends, or center of the cord, and push through one side of a buckle.

Pull tight leaving the joined ends near the buckle.

Bring the ends of the cord down through the other side of the buckle.
This tutorial will start with the left patterned cord making it the center in the design. If you would rather have the solid cord in the middle, start with the right solid cord.

Step 1: Bring the left cord over the center two cords and under the right cord as shown.

Step 2: Bring the right cord under the center cords and up through the loop created on the left.

Step 3: Now reverse the steps and bring the right cord over the center two cords and under the left cord.

Pull tight being careful not to move the buckle and adjust the length if needed.

Slide the second piece of the buckle toward the other end until you reach the length desired for your finished bracelet.
Step 4: Bring the left cord under the center two cords and through the loop on the right.

Pull tight.

Repeat steps 1 through 4 until you reach the other end of the bracelet.

Trim and melt the ends to prevent fraying. This bracelet is about 8 inches and used about 4 feet in each color.
