Zig Zag Sinnet Bracelet

Materials:
Two 3.5 pieces of 550 paracord
One magnet clasp

{Cost for this project starts at $4.88}

**Step 1:** Use some glue and insert both pieces of paracord in one end of the clasp. Let dry completely (1 hour).

**Step 2:** Bring the left cord A over the right cord B.

**Step 3:** Bring cord A under B and up through the space between the two cords. Pull tight.

**Step 4:** Now bring cord B over cord A.
**Step 5:** Bring B under A and up through the space between the two cords. Pull tight.

Continue repeating steps 2 through 5 until you reach the desired length. Trim and melt the ends leaving enough cord to insert into the clasp.

Use more glue and insert the cords into the other end of the clasp. Let dry completely.

We used about three feet in each color to make a 7 inch bracelet. We also used regular super glue to attach the clasp.
