Turn 550 paracord into a tactical self-defense tool!

This project teaches you how to make a paracord belt using a double cobra weave. In making this belt we decided to stack the deck - "just in case" by adding hex nuts into the weave.

We used approximately 90 ft of paracord in making this 42 inch belt. It has 27 hex nuts woven into it. Here's the materials list:

- 35 - 40 ft of [electric blue](#) 550 paracord
- 35 - 40 ft of [black](#) 550 paracord
- Two 9 ft pieces of black 550 paracord
- [Belt buckle](#)
- Twenty-seven 1/4" hex nuts (use fewer or add more to customize it to your personal style)

Here are two more paracord self-defense belts.

Both were made by M. Shane Sullivan, owner of paracordgalaxy.com. Click on the pictures or click [here](#) to read his post about paracord self-defense belts.
