"Titanium Spring" is a great three color paracord bracelet project.

Get creative with your color combinations and have fun!

paracordgalaxy.com

Color #1: Choose a background color for the main body of the bracelet. For our bracelet we chose [Titanium 550 paracord](#).

Color #2: Choose an accent color. We went with [Neon Green 550 paracord](#).

Color #3: Choose your feature color. We selected [Yellow 550 paracord](#).

Follow this link for our free project tutorial.

**Titanium Spring
Bracelet Project
Tutorial**

We made our bracelet 9 inches long (including the [5/8" buckle](#)) and approximately 1 inch wide. We used 9 feet of 550 paracord for color #1 and 5 feet each for colors #2 and #3.

For a larger project plan on approximately 1 foot of paracord for each inch of the main body. For both the accent and feature colors plan on approximately 6 inches of paracord for each inch of finished length.

Notes:

- To get started, begin making a Four Strand Double Cow's Hitch. ([Follow this link for instructions](#) if needed.)
- You'll need a [Paracord Lacing Needle](#) (aka Fid) to finish the sides of the bracelet and weave the paracord ends into the body of the bracelet.
